

UNIVERSITY OF CALIFORNIA

Planning to start a family?

We are recruiting women who are planning to start a family, as well as men and women who do not plan on becoming pregnant.

Compensation up to \$1120

Participants may receive additional reimbursement for payments on an as-needed basis for reasons related to participation in the study.

Please help us learn more about the maternal brain before, during, and after pregnancy.

Eligibility:

- Planning to start a family
- **Between the ages of 25 to 40**
- No history of major neurological disorders

Study Includes:

- 1 to 2 in-person visits (\$40/visit) per month at UCSB or UCI over a 1-year period, one scan at 6 mos. postpartum, one scan at 12 mos. postpartum
- Brief MRI brain scan at each visit (up to 28 scans total)
- Blood draw (a few teaspoons) at each visit
- Medical history and activity questionnaires
