

Brain Health Initiative

**Have you had an MRI?
Complete our “add on” questionnaire today!
Takes 5-10 minutes to complete**

Researchers at the University of California are interested in learning more about common factors that influence brain structure and function in adulthood. The purpose of this study is to understand the relationship between lifestyle factors and the brain.

Eligibility:

- Women and men between the ages of **18-100** years old
- Must have completed an MRI at UCSB, Berkeley, or Irvine’s Brain Imaging Center

Study Includes:

- An online questionnaire (takes ~5-10 minutes)
- Responses are linked to your brain imaging data
- Online questionnaire can be completed at the time of your MRI scan or after your visit

Interested?

Ask your MRI technician for more information.
