

Brain Health Initiative

Have you had an MRI?
Complete our “add on” questionnaire today!
Takes 5–15 minutes to complete

Researchers at the University of California are interested in learning more about common factors that influence brain structure and function in adulthood. The purpose of this study is to understand the relationship between lifestyle factors and the brain.

Eligibility:

- People between the ages of **18–100** years old
- Must have completed an MRI at UCSB, Berkeley, Irvine, Davis, UCSF, UCSD or Riverside’s Brain Imaging Center

Study Includes:

- 1 brief online questionnaire (takes ~5–15 minutes)
- Responses are linked to your brain imaging data
- Online questionnaire can be completed at the time of your MRI scan or after your visit
- Receive a \$10 electronic gift card upon completion of questionnaire

Interested?

Ask your MRI technician for more information.
